How to Recalculate Qty Allocated

There are times in Sage 100 Multi-Bin Inventory will have items with allocations against it when the Sales Order, Sales Order Invoice, Work Order Entry or Production Management entry holding the allocation has since been deleted. When this occurs, the Recalculate Quantity Allocated tool will help resolve those issue.

- I. Go to Multi-Bin Recalculate Quantity Allocated under Inventory Management then Utilities

- II. Select appropriate checkboxes (make sure to select Rebuild Sort Files) and click Proceed
